Place analyses : Servaco

I Fire resistance for furniture BS 5852 source 0

The test is executed without a soaking procedure and executed over a non FR foam of 23 kg/m³

cigarettest

Pass

Remark: full report in annex.

The results relate only to the ignitability of the combination of upholstery composites under the conditions of the test; they are not intended as a means of assessing the full potential fire hazard of the materials or products in use.
